Marine Geology Volume 142, 1997

Special Issue: Results and Prospects from the joint USSR Australia USA PNC Geological Study of the Manus Basin during the 21st Cruise of the R/V *Akademik Mstislav Keldysh*. Edited by K.A.W. Crook, A.P. Lisitzin and I.A. Borissova

Dedication to Lev Pavlovich Zonenshain (1929–1992)
K.A.W. Crook 1
International scientific planning of the 21st cruise of R/V *Akademik Mstislav Keldysh* and publication of its results: an introduction to the Special Volume
K.A.W. Crook 3
Hydrological and geochemical anomalies associated with hydrothermal activity in SW Pacific marginal and back-arc basins
A.P. Lisitzin, V.N. Lukashin, V.V. Gordeev, T.F. McConachy, S.D. Scott and V.P. Shevchenko 7
Bacterial chemosynthesis and methanotrophy in the Manus and Lau basins ecosystems
A.Yu. Lein, N.V. Pimenov and V.F. Galchenko 47
Geochemistry of basalts from the western Woodlark, Lau and Manus basins: implications for their petrogenesis and source rock compositions
S.I. Dril, M.I. Kuzmin, S.S. Tsipukova and L.P. Zonenshain 57
Geophysical and morpho-tectonic study of the transition between seafloor spreading and continental rifting, western Woodlark Basin, Papua New Guinea
V. Benes, N. Bocharova, E. Popov, S.D. Scott and L. Zonenshain 85
Low-temperature hydrothermal deposits of Franklin Seamount, Woodlark Basin, Papua New Guinea
Yu.A. Bogdanov, A.P. Lisitzin, R.A. Binns, A.I. Gorshkov, E.G. Gurvich, V.A. Dritz, G.A Dubinina, O.Yu. Bogdanova, A.V. Sivkov and V.M. Kuptsov 99
Precious metals in barite–silica chimneys from Franklin Seamount, Woodlark Basin, Papua New Guinea
R.A. Binns, J.M. Parr, J.B. Gemmell, D.J. Whitford and J.A. Dean 119
Sediments of the active rift zone in the western Woodlark Basin and the development of hydrothermal and volcanic activity
Yu.A. Bogdanov, E.G. Gurvich, A.P. Lisitzin, V.V. Serova and Z.N. Gorbunova 143
Late Quaternary palaeoceanography of the western Woodlark Basin (Solomon Sea) and Manus Basin (Bismarck Sea), Papua New Guinea, from planktic foraminifera and radiocarbon dating
M.S. Barash and V.M. Kuptsov 171
Late Quaternary diatom assemblages and their stratigraphic significance, western Woodlark Basin, Papua New Guinea
V.V. Mukhina 189
Megafauna associated with hydrothermal vents in the Manus Back-Arc Basin (Bismark Sea)
S.V. Galkin 197
The Manus Spreading Center near 3°22′S and the Worm Garden hydrothermal site: results of *Mir2* submersible dive 15
J. Sinton 207
